EXPERIENCE

Managing Member & Lead Programmer May 2026 – Present

Logludo LLC

- Built an edge-native serverless ingress API using Cloudflare Workers (TypeScript) across 300+ global points of presence, delivering sub-15ms p95 ingestion latency for game telemetry at scale.
- Developed an AI-integrated SDK instrumentation system using Google Gemini and GitHub App integration to autonomously analyze game codebases, inject telemetry code, and open pull requests.
- Received a Purdue University assistantship to continue development in collaboration with faculty.

Information Technology Intern May 2026 – Aug 2026

Inteva Products LLC

- Developed and deployed full-stack web applications using C# to optimize production floor tracking and live hardware monitoring systems.
- Authored technical documentation and improved SharePoint sites to streamline operations across teams.

Founder & Director Mar 2019 – Present

Sheep Studios, LLC

- Developed 5 published game titles using C# and Unity, managing full software lifecycles from code to release.
- Negotiated licensing deals and maintained web infrastructure to distribute digital games to 2M+ players worldwide.

Shift Manager Jun 2023 – Feb 2026

Mike's Carwash, Inc.

- Promoted to Shift Manager to lead 10+ associates in daily operations, facility maintenance, and equipment troubleshooting.

IT Intern Programmer Mar 2022 – Sep 2022

Steel Dynamics, Inc.

- Collaborated with engineering teams to develop production software using C# and Visual Studio.
- Utilized Agile Kanban workflows and Git to rapidly prototype and scale production software modules.
